

# Arch Bridge Design Competition

Evan, Raul, Krish, and David

# Design

- Half spheres of tennis balls with a full tennis ball as the center piece.
- Predicted score:7.5

# Final Design

Final measured score: 4.5

# Lessons Learned

- We would repeat the process at which we selected our design because we had a couple of ideas but narrowed it down to one idea.
- Unfortunately, we were rushed before the final day and therefore had to present our bridge with little to no practice with our model.
